#119 REWIRING THE BRAIN: Clinical Ways to Train the Brain by Understanding Neuroplasticity and Graded Motor Imagery

SUMMARY: New information regarding changes in the brain or cortical reorganization has prompted a different approach in therapy to modify the brain changes. Current concepts of using graded motor imagery, which is a top down treatment, will be presented along with implications for rehabilitation. This course will emphasize a clinical reasoning approach supported by current evidence in the literature for top down treatment, musculoskeletal and neurological consequences to injury.

This is an 8 hour course which consists of lectures, labs and individual case studies. At the completion of this course attendees will have developed skills to take back to the clinic for immediate utilization.

Presenter: Susan W Stralka PT,DPT, MS is a licensed physical therapist with over 35 years of experience.She is a guest lecturer at The University of Tennessee Health Science Center in Memphis, Tennessee where she earned her PT Degree,Masters Degree and Doctorate in Physical Therapy . She has a strong clinical back round in treating both neuro and musculoskeletal difficult pain syndromes .Susan has presented nationally and internationally and has many publications to her credit. Her most recent publications are "Graded Motor Imagery " in the Journal of Hand Therapy 2011 and a chapter on "Thoracic Outlet Syndrome" in the book Neck and Arm Pain Syndromes" published by Elsevier in 2011.

OBJECTIVES: Upon completion of this course the participant will be able to:

- Describe the biopsychosocial factors involved in pain management
- Understand neuroplasticity and the changes that occur in the brain
- Recognize the components of central sensitization
- Understand the role of normal and abnormal peripheral and central mechanisms
- Utilize graded motor imagery for musculoskeletal and neurological insults
- Apply the information presented on rewiring the brain into clinical practice.

FORMAT: This is an 8-hour course equivalent to 0.8 CEUs. Motivations, Inc. is an approved CEU provider by AOTA. This course is approved by Texas Physical Therapy Association and the physical therapy boards or APTA chapters in the states where the course is held.

AUDIENCE: Physical Therapists, Physical Therapy Assistants, Occupational Therapists, and Occupational Therapy Assistants

AGENDA:

8:00 - 9:00	Neuroplasticity and the brain
9:00 - 10:15	What is central sensitization and its consequences
	Break
10:30 - 12:00	Concepts of graded motor imagery
12:00 – 1:00	Lunch
1:00 - 2:30	Musculoskeletal and neurological indications for treatment
	Break
2:45 - 3:45	Lab using laterality, imagery, and mirror therapy
3:45 - 4:30	Treatment protocols and home exercise programs
4:30 - 5:00	Summary and questions and answers
